

James O. Balito

Victorias City, PH | (+63) 9519701044 | Jamesbalito@gmail.com | github.com/james-balito | linkedin.com/in/jamesbalito

Aspiring Full-Stack Developer and Information Systems student with practical experience engineering dynamic web applications using Laravel, React.js, and Filament. Combines strong system analysis skills with a passion for building seamless, high-performance user interfaces and robust automated data systems.

EDUCATION

Colegio de Sta. Ana de Victorias

2022 - 2026

Bachelor of Science in Information Systems

Relevant Courses: Web Development, Data Structures & Algorithms, Object-Oriented Programming, Databases

TECHNICAL SKILLS

Languages & Web: PHP, JavaScript, TypeScript, C++, HTML5, CSS3

Frameworks & Libraries: Laravel, React.js, Inertia.js, TailwindCSS, Bootstrap, Filament

Databases & Tools: MySQL | Git, Github, VS Code, Figma

PROFESSIONAL EXPERIENCE

Front-End Developer Intern | Warlen Industrial Sales Corporation, Bacolod City

Feb 2026 - May 2026

- Built core front-end payroll modules using RILT Stack, optimizing state management to ensure accurate, real-time data rendering.
- Collaborated with backend developers and designers to align UI components with business logic and database requirements.

PROJECTS

Web-Based Veterinary Appointments & Pet Product Shopping System

Capstone Project | *System Analyst & Front-End Developer*

- Analyzed complex workflows to eliminate bottlenecks and refined the front-end UI to deliver a seamless, intuitive user experience.

Secure Profiling System with Role-Based Access Control and Automated Announcements

2nd Year Mini-Capstone Project | *Front-End Developer*

- Designed and implemented secure, intuitive profiling and announcement interfaces to streamline navigation across different user roles.

Automated Excel Data Insertion & Calculation System

Personal Project | *Full-Stack Developer*

- Developed an automated cross-sheet Excel pipeline using AI-assisted workflows to optimize formulas and eliminate manual data entry.

Hardware Inventory & Point of Sales System

Personal Project | *Full-Stack Developer*

- Developed a real-time inventory and POS system using the TALL stack and Filament, featuring automated stock updates, advanced search filtering, and live sales reporting.

Men's Station Thrifting Store

Academic Project | *Videographer & WordPress Developer*

- Served as Videographer and Editor for promotional commercial videos while enhancing the WordPress website UI to improve user engagement.

CERTIFICATIONS

- Certificate of Publication:** Peer-reviewed research paper, "*Web-Access Veterinary Appointments and Pet Product Shopping with Online Payment Services*" in the **IJCSMC Journal** (April 2026).

SEMINARS ATTENDED

- DICT Seminar: Startup Awareness, Cybersecurity, Web3 & Blockchain (Sept 2025)
- Project Management: Building Success, One at a Time (Dec 2024)
- AI in Education: Enhancing Student Success (Dec 2024)
- Victorias In Motion (Oct 2024)
- Let's CHAT to Navigate the Future with Success (Dec 2023)
